

Putting **you** in control

Electrical Control Panel Manufacturers (Industrial and Hazardous Area)

Kestral Controls is a family owned business, which has been successfully manufacturing and supplying electrical control panels for more than 35 years. The company has grown steadily over the years to become one of the largest independently owned control panel manufacturers in Scotland. This has primarily been achieved by focusing on superior customer service and good engineering practice through the development of highly qualified staff with a solid engineering background. We have a broad customer base to which we supply a diverse range of control panels to fulfil a variety of applications and uses. As well as working within strict environmental guidelines Kestral recognise the importance of operating according to your individual requirements.

ORDER ONLINE

online ordering now available at

We place a high level of importance on providing a bespoke, personal and quality service for our clients.

We believe this can only be properly achieved by investing in our most important asset – the people we employ. Many of our personnel have been with Kestral from apprenticeship or trainee level and some have lengths of service dating back to the companies formation in 1967. This means our clients ultimately benefit through invaluable experience, workmanship, knowledge as well as consistency of product, service and working relationships.

Hazardous Area
